

“The BME Skills Project is looking to offer more bespoke support during the COVID-19 Pandemic. For this time we will be moving away from our model of completing organisational health check to more a responsive COVID-19 support. To shape this support we are asking BME community groups or groups that support the BME community to fill in this questionnaire

Groups don't have to be supported by the project previously to receive this support and we would really appreciate if people would fill in the form regardless of whether they want the support”
