

Application for Planning Permission and Listed Building Consent for Alterations, Extension or Demolition of a Listed Building

Town and Country Planning Act 1990

Planning (Listed Buildings and Conservation Areas Act) 1990

1. Applicant Name and Address

Please enter the Applicant Details, including full name and title. Please also enter the house/flat number and/or name (if applicable) and street name in the Street address field. The town, county, country and full postcode should also be entered.

If the application is being submitted by an agent (i.e. someone who is acting on the applicant's behalf) all correspondence, including the decision letter, will be sent to him/her.

2. Agent Name and Address

Please enter the Agent Details, including full name and title. Please also enter the house/flat number and/or name (if applicable) and street name in the Street address field. The town, county, country and full postcode should also be entered.

If the application is being submitted by an agent (i.e. someone who is acting on the applicant's behalf) all correspondence, including the decision letter, will be sent to him/her.

3. Description of Proposed Works

Please describe the proposal for which you are seeking planning permission accurately and concisely. Provide details of all the uses/buildings proposed.

Example:

- *erection of five, two-storey three bed houses*
- *demolition of existing warehouse and redevelopment of the site to provide 25 x two bed flats in two five-storey blocks with ancillary car parking, open space and new access from London Road*
- *change of use from office to an A1 Shop*
- *conversion of a semi-detached house to three self-contained flats*
- *installation of a new shop front*

Please also describe whether the proposal involves complete or partial demolition of listed buildings and specify the building(s) or part(s) affected. Please give a brief description of the degree of demolition proposed and other works to the listed building(s).

Example:

- *complete demolition of garage to side of property*
- *removal of chimney and chimney stack to the side of property*
- *conversion of existing loft space to provide extra bedroom and en suite facilities*
- *removal of existing fireplace and flooring and installation of new power points, wiring and underfloor heating*
- *removal of partition wall to create open plan kitchen/dining area*

4. Site Address Details

Please enter the full postal address of the site. Enter the house/flat number and / or name (if appropriate) and street name in the Street address field. The town, county and full postcode should also be entered. If the application relates to open ground describe its location as clearly as possible (e.g. 'Land to rear of 12 to 18 High Street' or provide a grid reference).

When you submit a location plan, it is recommended that this is at a scale of 1:1250 or 1:2500, showing at least two named roads and surrounding buildings. The properties shown should be numbered or named to ensure that the exact location of the application site is clear.

The application site must be edged clearly with a red line on the location plan. It should include all land necessary to carry out the proposed development (e.g. land required for access to the site from a public highway, visibility splays (access around a road junction or access, which should be free from obstruction), landscaping, car parking and open areas around buildings).

A blue line must be drawn on the plan around any other land owned by the applicant, close to or adjoining the application site.

All plans must be to a metric scale and any figured dimensions given in metres and a scale bar should be included. Each plan should show the direction of North.

5. Pre-application Advice

The local authority may be able to offer (possibly for a fee) pre-application discussions before a formal application is submitted in order to guide applicants through the process. This can minimise delays later in processing the application.

Pre-application discussions can also help you and the planning authority identify areas of concern about your proposed development so that you can give consideration to amending your proposal before the application is submitted. The advice and guidance given to you at the pre-application stage is given in good faith. However, it does not guarantee or supply a definitive undertaking as to whether your proposal is likely to be acceptable.

If you have received pre-application advice from the planning service please indicate the reference/date of any correspondence or discussion and the name of the officer. If you do not know these details then please state '*Unknown*'.

This will assist the Council in dealing with your application as quickly as possible.

6. Pedestrian and Vehicular Access, Roads and Right of Way

You must indicate on your form whether you propose any new highway(s) and show the location of these on your plans. Any public highway or footpath that crosses or adjoins the site or is affected must be shown clearly on the plans, including any proposals that may require a closure or diversion. Legal procedures for diversion or closures must be completed prior to works commencing on site.

Extinguishment of a footpath or bridleway can only be achieved where it can be shown that there is no longer a need for the right of way. In deciding this, an authority must take into account how much the route is likely to be used by the public before extinguishment and the effect of the extinguishment on the land over which the route passes.

If you are proposing to undertake any works that will affect the pavement or roadway then it is advisable to seek advice from the local highways authority.

7. Waste Storage and Collection

Please identify what provision has been made for the storage of waste and recycling as part of the proposal, and demonstrate that these aid the collection of waste and recycling materials by the waste collection authority. The location of waste storage and recycling facilities should be clearly identified on the plans.

8. Neighbour and Community Consultation

The Council will consult your neighbours in most circumstances. It is often better to tell your neighbours prior to submitting the application rather than letting the Council's official letter of notification bring the application to their attention for the first time.

9. Council Employee/Member

You must declare whether the applicant or agent is a member of the council's staff, an elected member of the Council or related to a member of staff or elected member of the Council.

10. Demolition

If you have answered 'Yes' to the total or partial demolition of a listed building then you will need to indicate whether it is total or partial demolition of the listed building or buildings within the curtilage of the listed building.

If it is partial demolition you will need to provide details of the volume of the listed building and part to be demolished. You should calculate the cubic content figure on the basis of the external dimensions of the property.

Where an application includes demolition your attention is drawn to the guidance set out in *Planning Policy Wales (2010) Chapter 6 "Conserving the Historic Environment"*:

<http://wales.gov.uk/docs/desh/publications/100608planningppwchapter6en.pdf>

The scope and degree of detail necessary in the written justification will vary according to the particular circumstances of each application. It is strongly recommended that the applicant/agent and officers discuss the scope and degree of detail to be included in this justification before submission of the application.

11. Listed Buildings Alterations

A written explanation of the proposed works should include:

- an assessment of the impact of the works on the significance of the asset
- a statement of justification explaining why the works are desirable or necessary (this should include development appraisal where appropriate)
- an archaeological assessment or field evaluation and a mitigation strategy where important archaeological remains may exist, and
- (when works include significant elements of demolition or rebuilding,) a structural report by an engineer familiar with heritage assets, which identifies defects and proposes remedies

12. Listed Building Grading

When buildings are listed they are placed on statutory lists of buildings of 'special architectural or historic interest' compiled by the Welsh Assembly Government under the *Planning (Listed Buildings and Conservation Areas) Act 1990*, on advice from Cadw, the historic environment service of the Welsh Assembly Government.

Listed buildings are graded to show their relative importance:

- Grade I buildings are those of exceptional interest
- Grade II* are particularly important buildings of more than special interest
- Grade II are of special interest, warranting every effort to preserve them

Please confirm the grade of the listed building which is the subject of this application. If you are unsure as to the grade of the building please contact the planning authority.

13. Immunity from Listing

When permission is being sought or has been granted, any person may apply to Cadw, the historic environment service of the Welsh Assembly Government, for a certificate that it is not intended to list the building(s).

- If a certificate is granted, the building cannot be listed (and the local authority cannot issue a building preservation notice) for a period of five years.
- If the certificate is not granted, the building will normally be added to the statutory list.

An application for a certificate may be made only where an application (whether pending or granted) has been made for planning permission for development, which involves the alteration, extension or demolition of the building, although the applicant for that permission and the applicant for immunity from listing need not be the same person.

Applications for a certificate of immunity should normally be accompanied by a plan showing the position of the building or buildings involved and photographs of each elevation of the building; any notable interior features should be supplied together with details of the approximate date of its construction, the architect (if known) and any available information about the architectural or historic interest of the building.

14. Vehicle Parking

Please specify the total number of existing parking spaces and the total number of proposed parking spaces (including spaces retained) by vehicle type. Please include garage spaces.

If no parking spaces are to be provided you should show on your plans or describe in a supporting statement where vehicles are to be parked.

The diagram below shows the minimum size of car parking spaces. However, further advice and guidance should be sought from your planning authority.

Minimum size of parking spaces

Minimum size

Minimum sizes for disabled parking spaces

15. Materials

Please describe the materials you wish to use for walls, roofs, etc. including the type, colour and name of all materials to be used. You should try to use materials to blend with existing buildings.

Additional information may be provided in a design and access statement or planning supporting statement or shown on drawings and plans.

If the current site is vacant or is to be demolished then please indicate 'existing' materials as being not applicable.

16. Foul Sewage

All new buildings need separate connections to foul and storm water sewers. If you propose to connect to the existing drainage system please show the details of the existing system on the application drawing(s). Note that in most circumstances surface water is not permitted to be connected to the public sewers. The use of soakaways will require satisfactory percolation tests to have been undertaken.

If the proposed development results in any changes/replacement to the existing system or the creation of a new system, scale plans of the new foul drainage arrangements will need to be provided. This will include a location plan, cross sections/elevations and specifications. Building Regulations Approval will be required. If connection to any of the above requires crossing land that is not in the applicant's ownership, other than on a public highway, then notice may need to be served on the owners of that land.

17. Assessment of Flood Risk

Where a development proposal may be at risk of flooding, a Flood Consequences Assessment (FCA) may need to be provided as part of the planning application.

Establishing the need for a Flood Consequences Assessment

An FCA will be required:

- where the proposed development is located in zones C1 and/or C2 on the Development Advice Maps associated with Technical Advice Note 15 (TAN 15): Development and Flood Risk (2004), published by the Welsh Assembly Government.
- in all other zones where flood risk is a potential issue

Further information on the need for, and requirements of FCAs, together with the definition of flood zones, is provided in Technical Advice Note 15 (TAN 15). Advice and guidance on flood risk should also be sought from your local planning authority, and from the Environment Agency, before submitting an application.

Development Advice Maps which show the flood zones can be viewed at the relevant local authority offices.

Technical Advice Note 15: Development and Flood Risk (TAN 15) can be viewed online at <http://wales.gov.uk/topics/planning/policy/tans/tan15?lang=en>

Objectives

The objectives of an FCA are to establish:

- the consequences of flooding on the development
- the consequences (overall impacts) of the development on flood risk elsewhere within the catchment
- whether appropriate mitigation measures can be incorporated within the design of the development to ensure that development minimises risk to life, damage to property and disruption to people living and working on the site or elsewhere in the floodplain.

Scope

Once it is established whether an FCA is required, the first step is to consult the Environment Agency about the scope of, and the objectives for, the assessment. It is recommended that these issues also be discussed with the local planning authority and the appropriate drainage body.

The FCA should always be proportionate to the degree of flood risk and the scale, nature and location of the proposed development. The scoping of the FCA should be done as early as possible in developing the planning application, as avoiding or mitigating flood risk may require important design considerations which are generally easier and more cost-effective to incorporate when developing the proposal.

Other sources of information

Where a Strategic Flood Consequences Assessment (SFCA) has already been completed by the local planning authority, FCAs should only need to focus on site-specific issues. The development plan policies should make it clear what issues need to be covered in the FCA.

Procedure and content

Guidance on the content of FCAs is given in TAN 15: Development and Flood Risk (2004), and should also be sought from the Environment Agency.

18. Biodiversity and Geological Conservation

Where a development proposal is likely to significantly affect features of biodiversity or geological conservation interest, it will be necessary to submit with the application sufficient information on what those effects are, in order for the local authority to determine it. The local planning authority may have produced a list of which features in their area will require such additional information. In some cases this additional information may be required based on a survey of affected species, habitats or geological features and an assessment of impacts. What is required will depend on the significance of the features and the scale and significance of the likely impacts, and what information the local authority already has. It will be advisable to discuss with the local planning authority what is required, and who may be competent to carry out any survey and assessment work required, prior to compiling the information and submitting the application.

It may be possible to obtain some of the necessary information via a search of ecological or geological data held by a local environmental records centre.

It is possible that survey information can be collected only at certain times of the year and the applicant will need to take this into account in preparing an application and considering the timing for the development. Depending on the survey information which the local planning authority requires, the following factors may need to be considered:

- the numbers and range of habitats, species of flora and fauna and/or geological features found on and where appropriate, around the site;
- the potential development impacts likely to harm the biodiversity or geological conservation features identified by the survey (both direct and indirect effects both during construction and afterwards). Including how:
 - alternatives designs or locations have been considered
 - adverse effects will be avoided wherever possible
 - unavoidable impacts will be mitigated or reduced
 - impacts that cannot be avoided or mitigated will be compensated

Further information on the legislative and national planning policy context for biodiversity and geological conservation can be found in the following documents:

“Planning Policy Wales” (2010) Chapter 5. “Conserving and Improving Natural Heritage and the Coast”

<http://wales.gov.uk/docs/desh/publications/100608planningppwchapter5en.pdf>

Technical Advice Note 5: “Nature Conservation and Planning” (2009)

<http://wales.gov.uk/topics/planning/policy/tans/tan5/?lang=en>

“Minerals Planning Policy Wales” (2001).

<http://wales.gov.uk/topics/planning/policy/minerals/mineralsplanning?lang=en>

19. Existing use

When describing the current use of the site please also include any details of the part(s) of any listed building(s)/structure(s) being affected.

When answering whether the site is currently vacant, this means whether the site is currently not in active use.

Contamination

Land affected by contamination covers all cases where the actual or suspected presence of substances in, on or under the land may cause risks to people, property, human activities or the environment. Sensitive uses include housing with gardens, schools, nurseries or allotments, and consideration should be given to whether the use could be particularly vulnerable to the presence of any contamination. Further information is provided in the following documents;

"Planning Policy Wales" (2010), Chapter 13 "Minimising and Managing Environmental Risks and Pollution"

<http://wales.gov.uk/docs/desh/publications/100608planningppwchapter13en.pdf>

TAN 21 (2001) "Waste"

<http://wales.gov.uk/topics/planning/policy/tans/tan21?lang=en>

You should also consult your waste planning authority's website which should make clear what the statement should contain.

20. Trees and Hedges

Paragraph 4.1.3 of '*BS 5837: 2005 Trees in relation to construction - Recommendations*' offers advice on how to identify trees on adjacent land that could influence the development.

Sections 4 to 7 of *BS 5837: 2005* contain detailed guidance on survey information and plans that should be provided. Using the methodology set out in the Standard should help to ensure that development is suitably integrated with trees and that potential conflicts are avoided.

[PLEASE NOTE this is an application for planning permission. It is not an application or notification to remove or prune protected trees (i.e. trees which are included in a tree preservation order or located in a conservation area).

If you are granted full planning permission, you will not need to obtain separate consent for tree works which are required to implement the planning permission. However, works to protected trees which are not required to implement the planning permission must be the subject of a separate application or notification using the tree works form.]

21. Trade Effluent

Please describe the type, quantities and means of disposal of any trade waste or effluent. If there is to be none please mark as 'NO'.

22. Residential Units (including Conversion)

Please enter the total number of existing and proposed dwellings, that exist at present and the number which would exist after your development, by category and dwelling type.

The categories are classified as:

- Market housing – includes properties for sale where prices are set in the open market.
- Social rented – includes rented housing owned by local authorities and registered social landlords for which guideline target rents are determined through the national rent regime, set out in the '*Guide to Social Rent Reforms*' published in March 2001. Also includes rented housing owned by other persons and provided under equivalent rental arrangements to the above, as agreed with the local authority or funded with grant from the Housing Corporation, as provided for in the *Housing Act 2004*.
- Intermediate – includes housing at prices or rents above those of social rent but below market prices or rents. This can include shared equity products (e.g. HomeBuy) and intermediate rent (i.e. rents above social-rented level but below market rents). Intermediate housing differs from low cost market housing (which Government does not consider to be affordable housing).
- Key worker – includes those groups eligible for the Housing Corporation funded Key Worker Living programme and others employed within the public sector (i.e. outside of this programme) identified by the Regional Housing Board for assistance.

The types of dwellings are classified as:

- a. Houses - a house is a dwelling that is not a flat and includes single storey bungalows.
- b. Flats or maisonettes – includes separate and self-contained premises constructed or adapted for use for residential purposes and forming part of a building from some other part of which it is usually divided horizontally. Maisonettes are flats containing more than one storey.
- c. Live-work units - accommodation that is specifically designed to enable both residential and business use.
- d. Cluster flats/non-self contained - units with no separate or self contained living and sleeping accommodation within a larger building of which it forms a part.
- e. Sheltered housing - specifically designed housing in a group with services such as the support of a warden, communal facilities, alarm systems and laundry services. Also includes grouped housing schemes without the services of a warden and other communal facilities.
- f. Bedsits/studios – refers to a bedroom/living room containing cooking facilities. In addition, it may also contain washing facilities or even a shower.
- g. Unknown Type

23. Non-Residential Floorspace

Definitions:

Gross internal floorspace is the internal area of the building, and should include circulation and service space such as lifts and floorspace devoted to corridors, toilets, storage, etc. It does not include any area external to the building(s).

Where more than one use class is proposed as part of any development, floorspace should be specified for each separate planning unit (by Use Class).

For proposed retail floorspace (Use Class A1) the amount of tradeable floor area of the total gross internal floorspace should also be provided. Tradeable floorspace is sales space which customers have access to (excluding areas such as storage).

For outline applications, please enter the maximum floorspace for each use for which you are applying.

All floorspace figures should be provided in square metres.

24. Employment

Please give details of the total number of existing people (i.e. already employed on the site) and any additional staff to be employed (in both full-time and part-time employment) as a result of the proposal being implemented, and calculate the total full-time equivalent posts.

Full-time equivalent numbers can be defined as a statistic representing the number of full-time employees that could have been engaged if the reported number of hours worked by part-time employees had been worked by full-time employees. This is usually calculated by dividing the 'part-time hours paid' by the standard number of hours for full-time employees and then adding the resulting quotient to the number of full-time employees.

Further information when applying for town centre and retail development in Technical Advice Note 4 (1996) "Retailing and Town Centres", published by the Welsh Assembly Government.

<http://wales.gov.uk/topics/planning/policy/tans/tan4?lang=en>

25. Hours of Opening

Provide details of the proposed hours of opening for each non-residential use proposed on the site. (In sensitive areas, or where a use could cause nuisance to neighbours, it is likely that the Planning Authority would impose a condition restricting the hours of operation on your proposed development should approval be given.)

In the event that the hours of operation do not match the hours of opening please provide this information in a supporting statement attached to the application.

26. Site Area

The area contained within the boundary of the site to which the application relates will normally be shown edged in red on the plan accompanying the application, while other land in the same ownership but not being developed is normally identified separately with a blue line. Site area should be provided in hectares.

For some application types the fee is based on the site area, in which case an accurate answer to this question is particularly important.

27. Industrial or Commercial Processes and Machinery

- **Landfill** - in all cases this should include void space to be created by mineral extraction.
- **Energy from waste incineration** - where the incineration of waste will generate electricity, heat or combined heat and power (CHP); where there will be no energy utilisation from incineration use 'Other incineration' box
- **Other incineration** - where there will be no energy utilisation from the incineration of waste
- **Transfer stations** - where the main activity will be the bulking up of waste for treatment or disposal elsewhere; may include some sorting, baling, compaction for recycling, but where this is the main activity use material recycling/recovery facilities (MRFs)
- **Material recovery / recycling facilities** - where the main activity will be the receipt and sorting of waste for recycling and recovery; may include centralised MRFs, community MRFs and as well as small scale recycling bring banks
- **Any combined mechanical, biological and/or thermal treatment (MBT)** - where a single application proposes a mix of technologies to treat a single waste stream on one site; where a single technology is proposed use the most specific waste facility type
- **Other treatment** - where a more specific waste treatment type does not describe the proposed activity; examples may include separation technologies, vitrification, autoclaving, etc.
- **Storage of waste** - where the proposal is for medium to long-term storage of waste; where waste will move to recycling, recovery or disposal in the short-term use Transfer Stations or MRFs
- **Other waste management** - including the recovery of waste to land under an exemption from waste permitting
- **Other developments** - to include incidental development proposals on existing sites such as leachate treatment plants and weighbridges, where these don't add waste management capacity

28. Hazardous Substances

Please give details, including type and quantity of hazardous materials to be used or stored on site. If your application involves the use or storage of hazardous materials above a certain quantity, Hazardous Substances Consent will be required. A list of these materials and the permitted quantities is set out in the *Planning (Hazardous Substances) Regulations 1992*:

http://www.opsi.gov.uk/si/si1992/Uksi_19920656_en_3.htm

29. Ownership Certificates

An ownership certificate must be completed stating the current ownership of the land to which the application relates under the *Town and Country Planning (Development Management Procedure) (Wales) Order 2012*.

It is an offence, knowingly or recklessly, to complete a false or misleading certificate.

• Certificate A - Sole Ownership

Certificate A should only be completed if the applicant is the sole owner of the land to which the application relates (i.e. the applicant is the freeholder and there are no leaseholders with seven years or more remaining on their leases).

If the application involves a leasehold flat then certificate A does not apply as the applicant is not the sole owner. Therefore, in this circumstance, the applicant should complete certificate B,C or D (see details below).

• Certificate B - Shared Ownership (All other owners known)

Certificate B should be completed if the applicant is not the sole owner but knows the names and addresses of all the other owners (e.g. this certificate will need to be served if the proposals encroach onto adjoining land).

The Notice to Owners ([Notice 1](#)) must also be completed and sent to all known owners.

A copy of the notice must also be sent with the application to the local authority.

• Certificate C - Shared Ownership (Some other owners known)

Certificate C should be completed if the applicant does not own all of the land to which the application relates and does not know the name and address of all of the owners.

The Notice to Owners ([Notice 1](#)) must be completed and sent to all known owners.

Where the owner is unknown the Notice to Unknown Owners ([Notice 2](#)) needs to be published in a local newspaper.

A copy of the notice must also be sent with the application to the local authority.

• Certificate D - Shared Ownership (All other owners unknown)

Certificate D should be completed if the applicant does not own all of the land to which the application relates and does not know the names and addresses of any of the owners.

The Notice to Unknown Owners ([Notice 2](#)) needs to be published in a local newspaper.

A copy of the notice must also be sent with the application to the local authority.

30. Agricultural Holdings

All full planning applications must include the appropriate agricultural holdings certificate to be considered by the local authority.

It is an offence, knowingly or recklessly, to complete a false or misleading certificate.

If the land to which the application relates forms an agricultural holding or part of an agricultural holding as defined by the *Agricultural Holdings Act 1986* and comprises land subject to an Agricultural Tenancy all agricultural tenants must be notified prior to the submission of an application.

You must either

- confirm that none of the land to which the application relates is, or is part of, an agricultural holding, or
- give notice to all tenants on the agricultural holding using the Notice to Agricultural Tenants ([Notice 1](#)). A copy of the notice must also be sent with the application to the local authority.

31. Planning Application Requirements & Local Level Requirements

There are two levels of requirements, national and local:

- **National** - Use the checklist to ensure that the forms have been correctly completed and that all relevant information is submitted.
- **Local** - The local planning authority will have produced a document (usually available from their website) which details any specific information that is required to accompany the application in addition to the national requirements.

Failure to complete the form correctly or to supply sufficiently detailed drawings or other relevant supporting information may result in your application being returned as invalid.

32. Declaration

Please sign and date your application

33. Applicant Contact Details

Please provide contact information for the applicant.

34. Agent Contact Details

Please provide contact information for the agent.

35. Site Visit

Access to the site (i.e. where the works are proposed to take place) may be required by the case officer. Please provide contact details in the event that an appointment needs to be made. This will assist the Council in dealing with your application as quickly as possible.
